

PRESS RELEASE ISSUED 6th JANUARY 2009 FOR IMMEDIATE RELEASE.

SGL move to improve financial services employment

Financial Services recruitment experts SGL Solutions, has today announced positive news for both employers and employees battling the current market downturn. SGL's Managing Director Lewis Greene has today stated that his company is actively seeking industry qualified financial advisers for posts available through their recently created international offshore arm of the business.

There is more positive news at home from the Milton Keynes-based financial recruitment specialist. With the Bank of England revealing only last week that even tighter controls are to be levied in coming months; SGL are pleased to announce that they are maintaining their fee structure at the level originally set back in 2006. Lewis sees this as a responsible step and a means by which his company can assist the industry to which his company is dedicated to.

Maintaining control of costs whilst still having the capacity to get the right people into the right posts will be a key factor for the industry in 2009, and SGL is the route for the financial services industry to achieve those necessary goals. Lewis Greene also stated that we are in a recession not a depression.
